PROFESSIONAL SUMMARY

Frontend Developer with 8+ years of experience designing and building responsive, maintainable user interfaces. Proficient in React.js, Next.js, TypeScript, and modern UI libraries. Delivered production features for insurance, financial-data, and global logistics products while collaborating with product, UX, and backend teams.

EXPERIENCE

EPAM Systems, India

Software Engineer (A2) | May 2022 – Present

Insurance Technology Provider (Remote Project)

Software Developer | Feb 2025 – Present

- Manage the onboarding of new business processes and transaction flows, overseeing requirement analysis, implementation, and production rollout.
- Develop dynamic, schema-based workflows with configurable transaction screens and business-rule validations using RJSE.
- Collaborate with product, business, and engineering teams to translate requirements into practical, scalable technical solutions.
- Lead production support activities, including incident resolution, UAT validation, and handling client-specific tickets.
- Mentor new team members on development workflows and coding standards while conducting thorough code reviews.

S&P Global (Remote Project)

Software Developer | Jun 2024 – Jan 2025

- Designed and developed UI components for the S&P Project, supporting the migration of two CMS platforms to AEM.
- Built and integrated reusable React components with the AEM framework in collaboration with backend developers.
- Ensured React components remained responsive and compatible across various devices and browsers.
- Identified and resolved complex bugs within React components during the integration process.

DHL SG (Remote Project)

Software Developer | Aug 2022 – Apr 2024

- Built reusable UI components for a global trade automation service.
- Collaborated with Business Analysts and UX teams to define and deliver innovative implementations.

- Worked with BFF and Backend teams to define API contracts and implement feature requirements.
- Authored comprehensive unit tests to ensure a minimum code coverage of 85%.
- Maintained high code quality to minimize Sonar code smells and improve the overall Sigrd score.

Syncfusion Software, Chennai, India

Senior Software Engineer | Apr 2018 – May 2022

- Developed and maintained frontend components, specifically the DataGrid, DataManager, and Pager web components.
- Implemented client-requested features for the Grid component while ensuring stability across releases.
- Diagnosed and fixed client-reported and internal bugs; managed support tickets and meetings to resolve technical issues.
- Mentored junior engineers on component features to ensure timely project completion.
